#### **REASONS FOR ALLOWANCE**

4. The following is an examiner's statement of reasons for allowance: Applicant has claimed an ornamental enhancer with an upper edge constructed and arranged to support a coupling device, and thus the coupling device and enhancer are handled as a

Art Unit: 3677

unitary structure. The male/female/male/female snap-style connectors, allowing a hanging ornament to be added to a jewelry item, or allowing the jewelry item to be wearable without the enhancer, is novel over the prior art of record. Examiner notes that children's snap-style beads do not have the female receptacle opening bounded by a raised wall, which serves to give a finished and tailored appearance to the jewelry item and conceal the snap-style projection. US Patent 6401488 was considered, esp. Figs. 8 as the enhancer and Fig 9 showing the enhancer in combination with a jewelry items, but 6401488 clearly emphasizes the connecting necks, while applicant's limitation of raised ring about the female receptacle serves to hide or minimize the neck. US Patent 5782107, while having concealed snap-style engagements, does not anticipate or make obvious interchangeable and optional enhancers, and lacks the structure of the raised ring about the female member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
